Kanban Project Report

Name: Meghna | SRN: PES1UG24CS269 | BPS#24

Overview

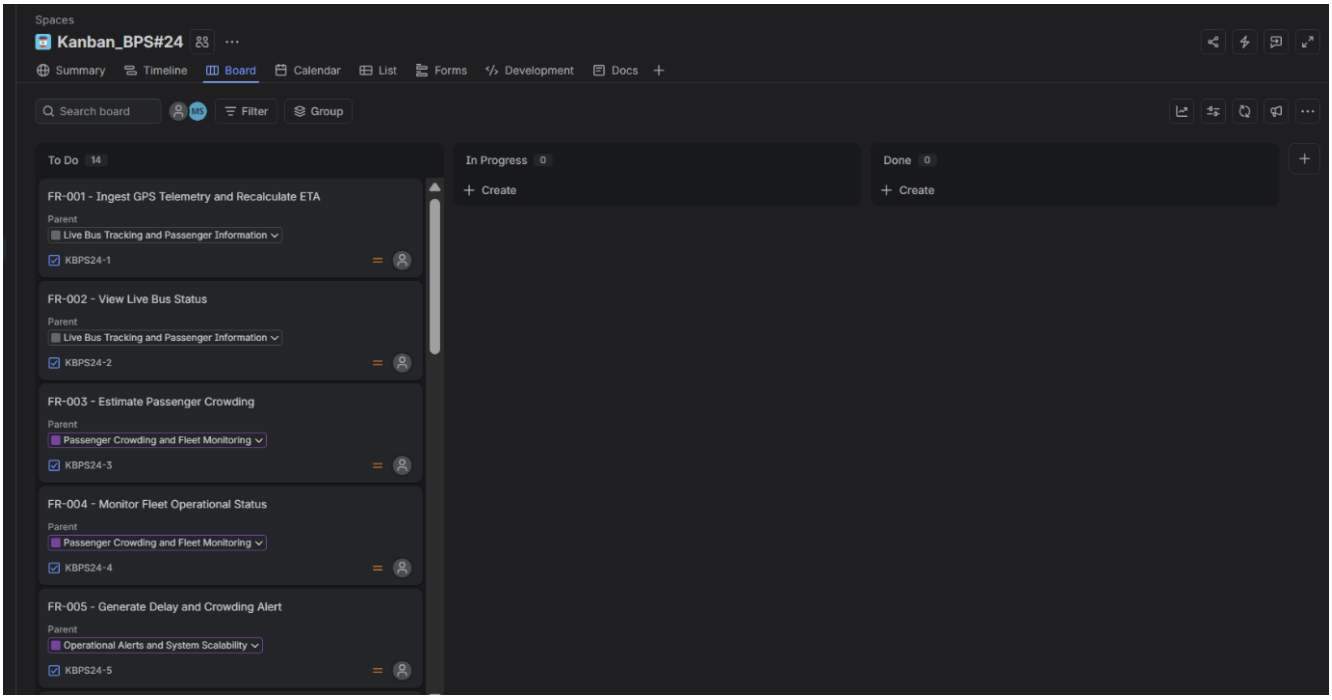

This report documents the Jira Kanban hands-on practice completed for the Public Bus Live Tracking and Crowding Estimator problem statement (BPS#24). The screenshots show the creation and organisation of requirements and related work items on the Kanban project.

Screenshot 1

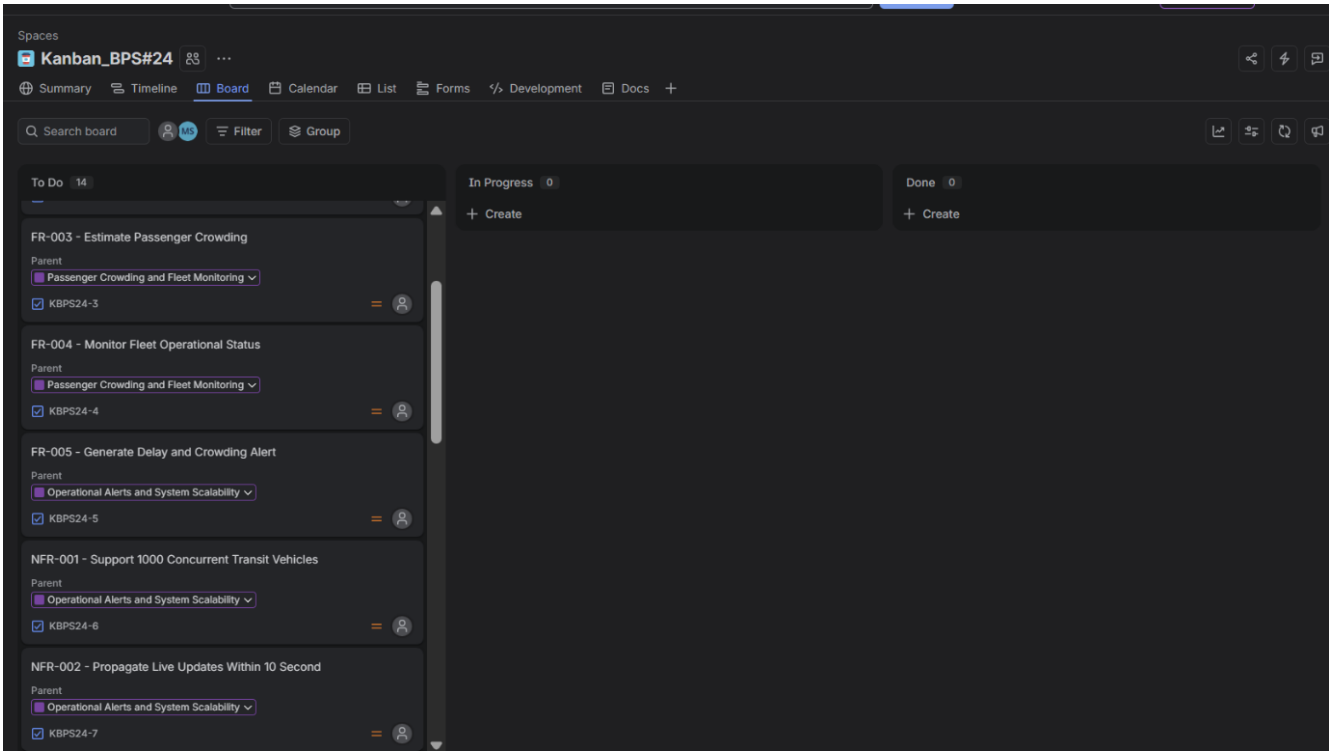

Kanban board created: The Kanban project board was created for BPS#24 with the standard workflow columns for managing work.

Screenshot 2

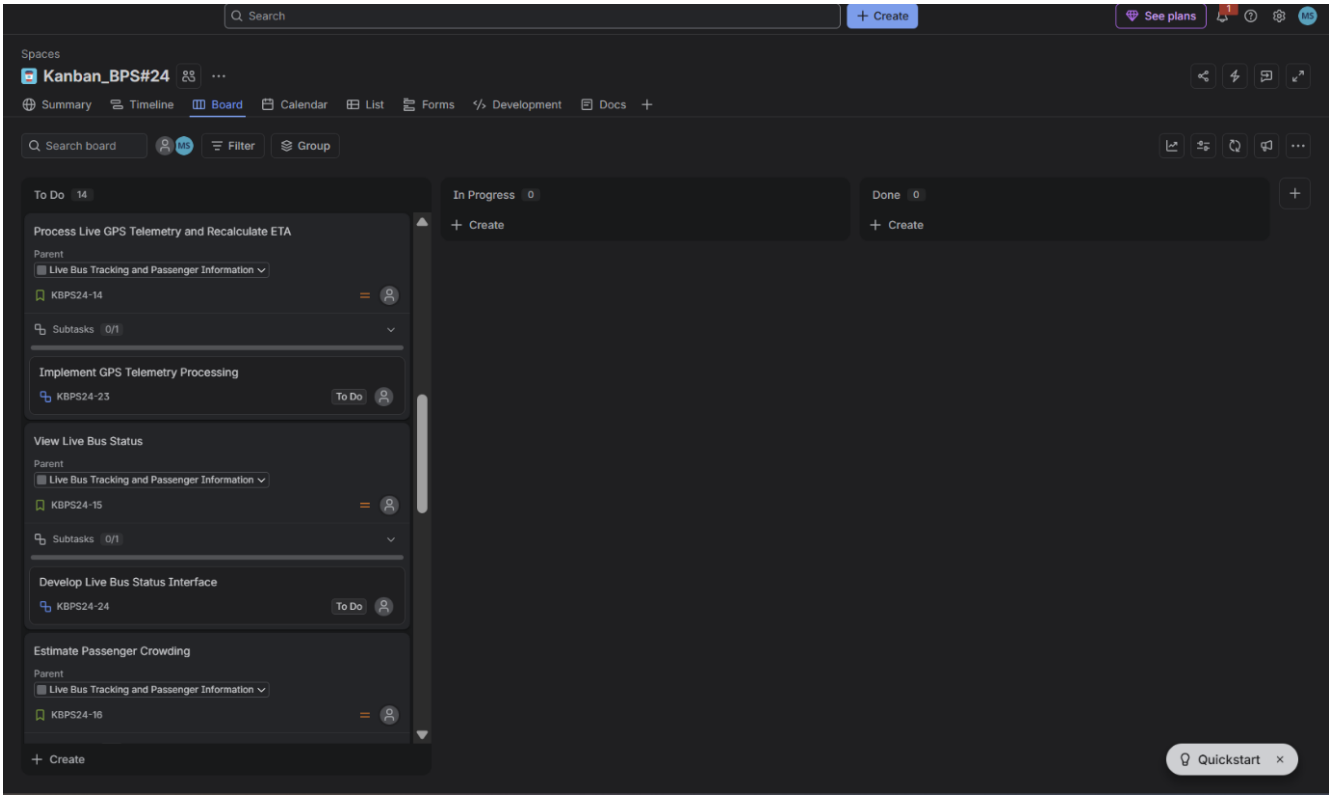

Requirements added: Functional and non-functional requirements were added to the Kanban board as work items.

Screenshot 3

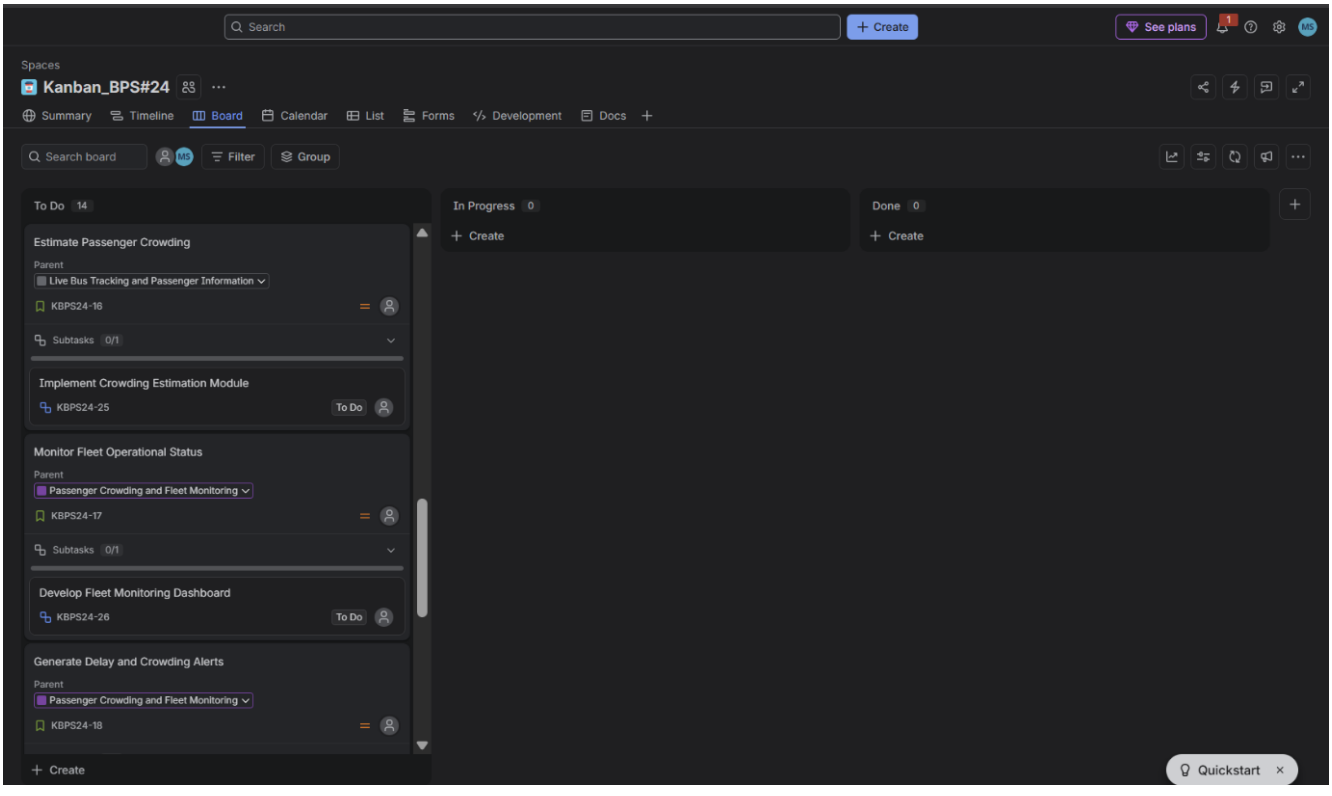

Requirement work items: The board shows the project requirements organised and ready for further planning.

Screenshot 4

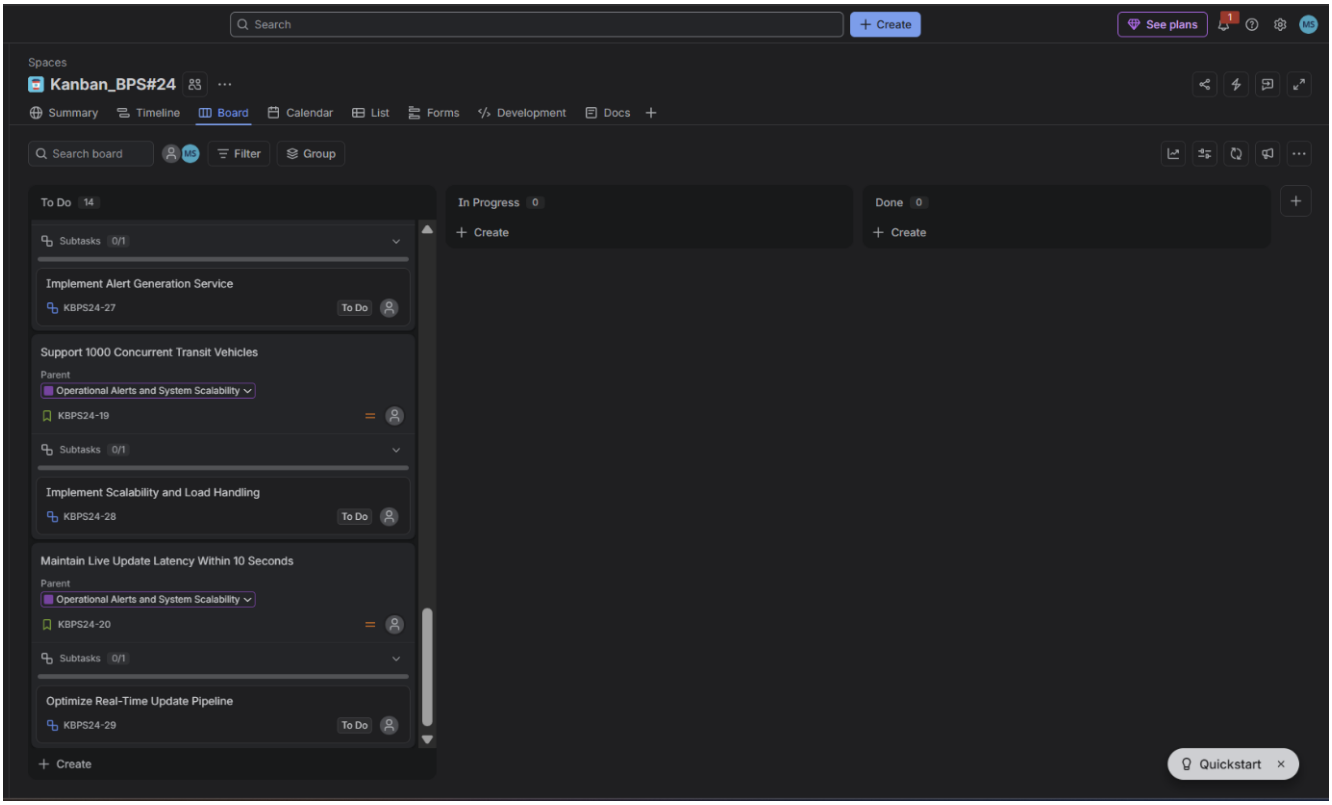

Stories and related work: Work items were expanded to represent the required system functionality.

Screenshot 5

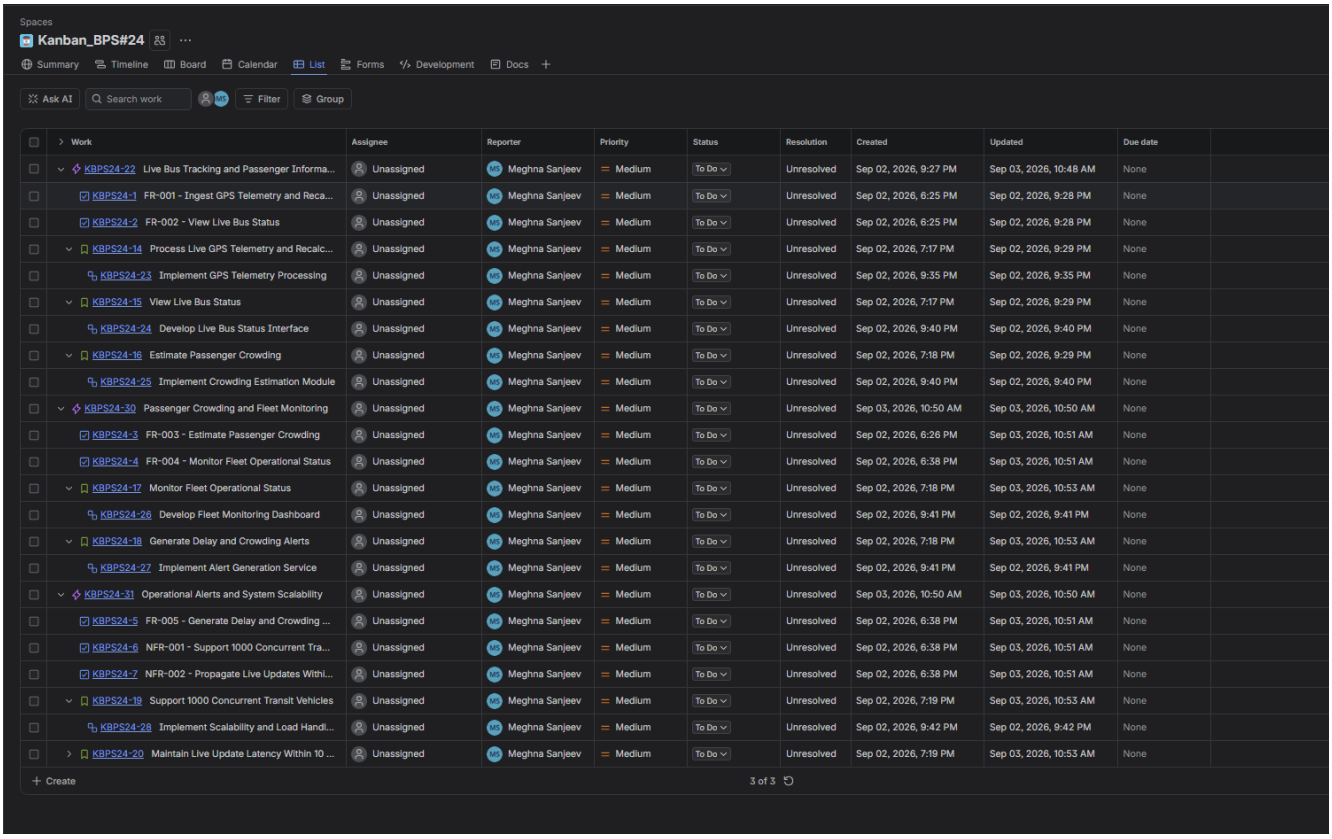

Task organisation: Tasks were created and organised under the relevant work items.

Screenshot 6

Backlog/work item planning: The project work items were organised for tracking and execution.

Screenshot 7

Final Kanban overview: The Kanban project contains the planned work items and their current workflow status.
