Scrum Project Report

Name: Meghna | SRN: PES1UG24CS269 | BPS#24

Overview

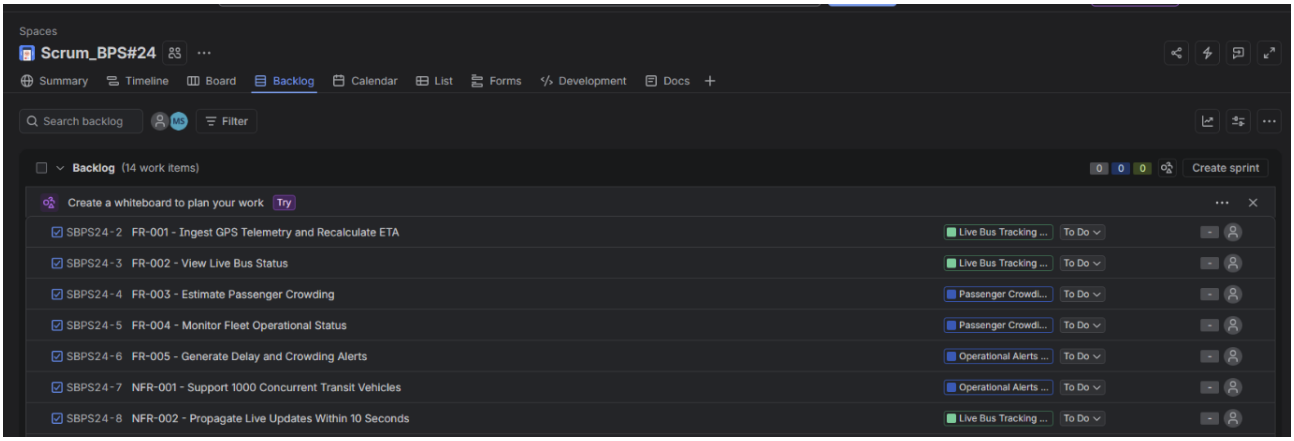

This report documents the Jira Scrum hands-on practice completed for BPS#24. The screenshots show the project backlog, work item organisation, and sprint-based planning used to manage the project incrementally.

Screenshot 1

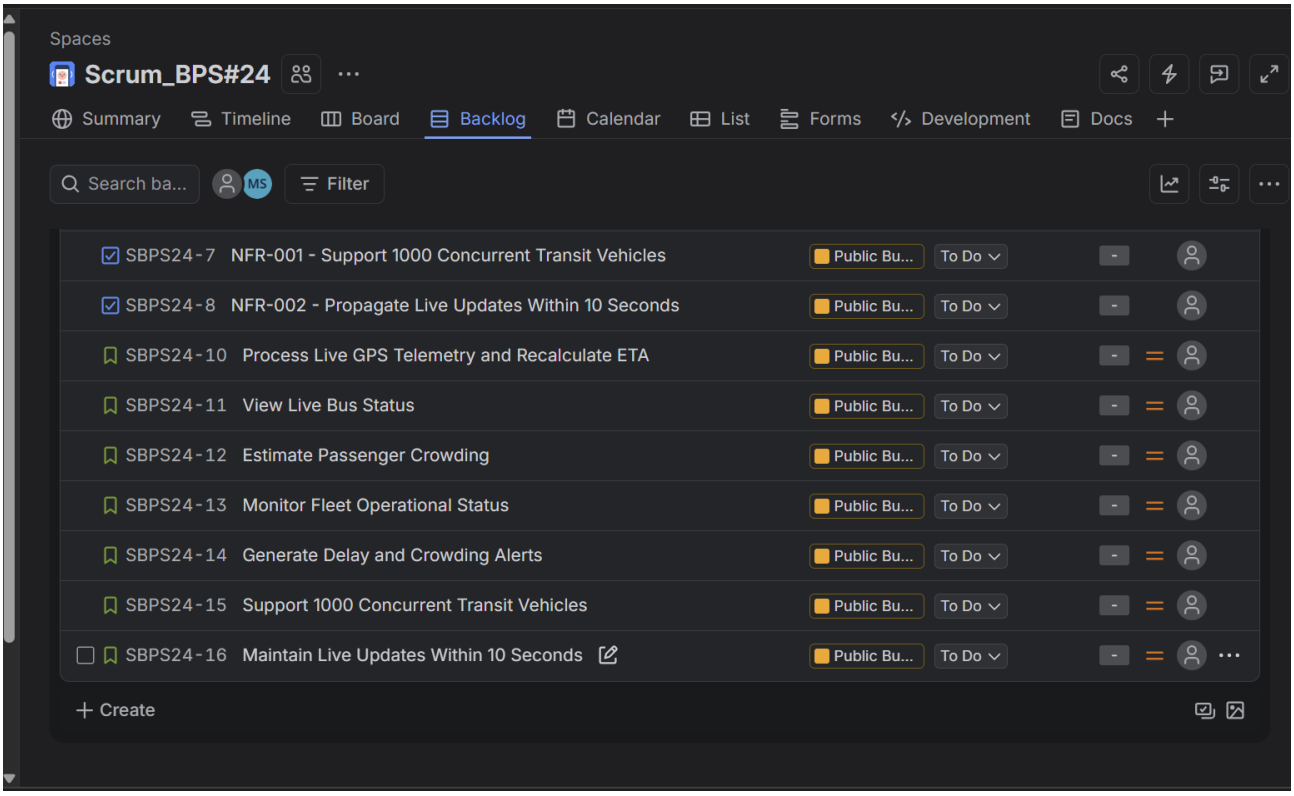

The Scrum project backlog was created and populated with the project work items.

Screenshot 2

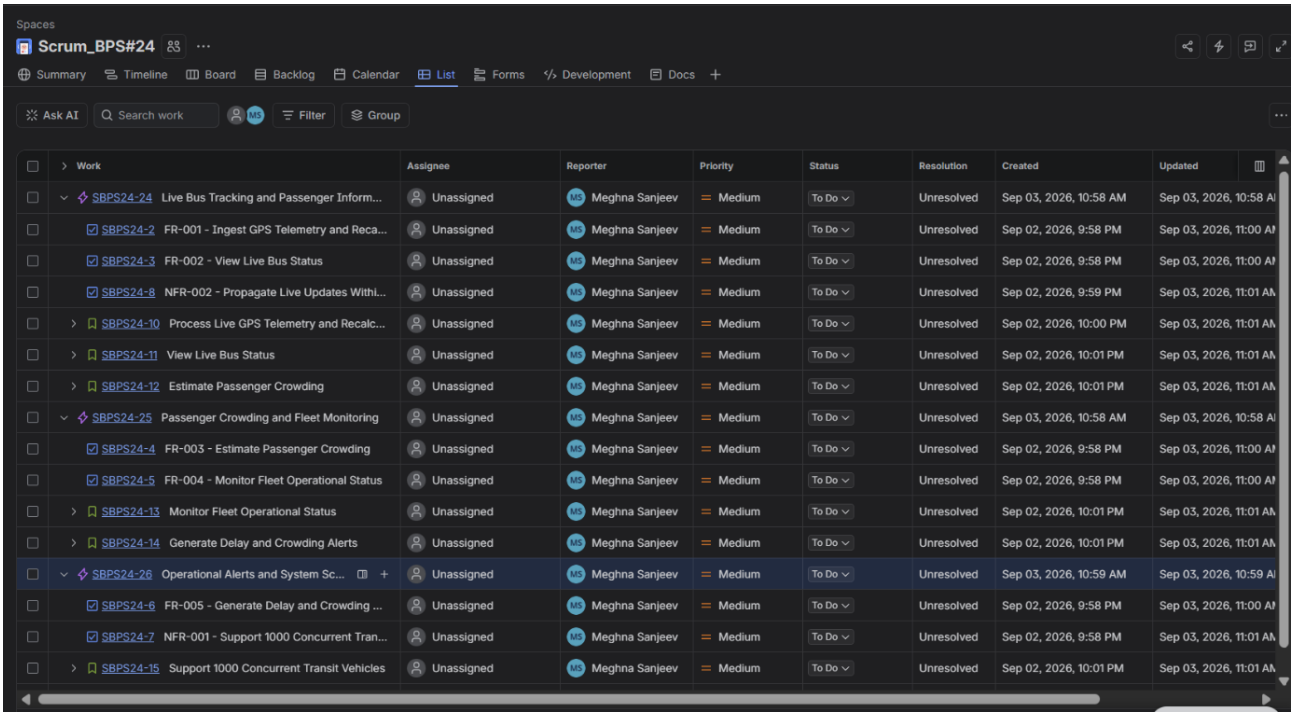

Work items were organised to support the planned Scrum project structure.

Screenshot 3

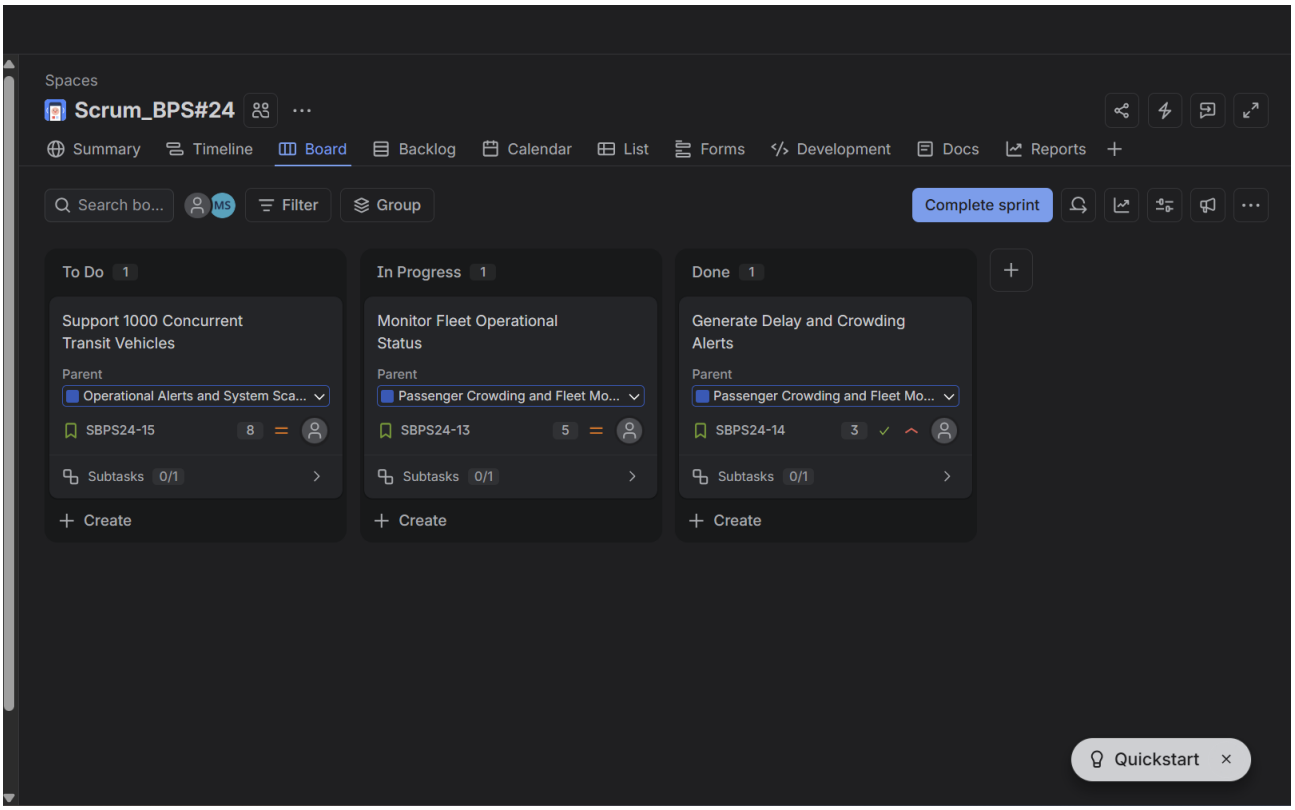

The Scrum backlog shows the requirements and stories prepared for sprint planning.

Screenshot 4

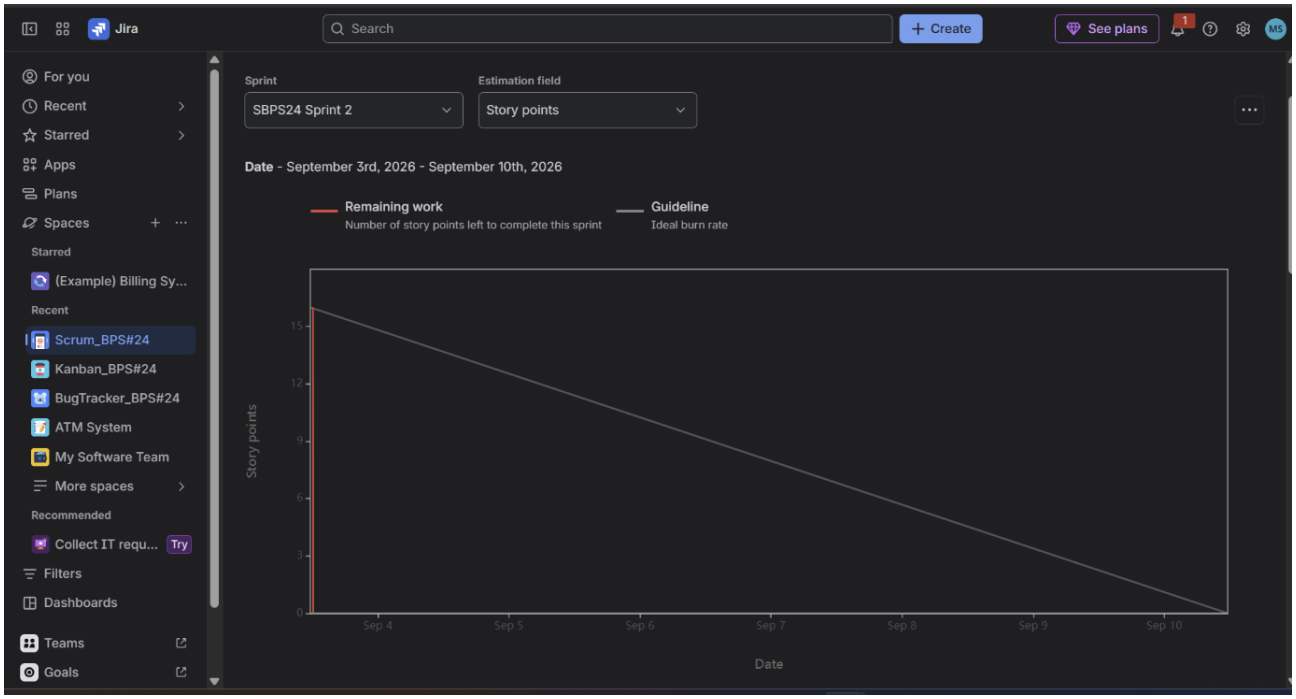

The project work items were tracked and organised within the Scrum workflow.

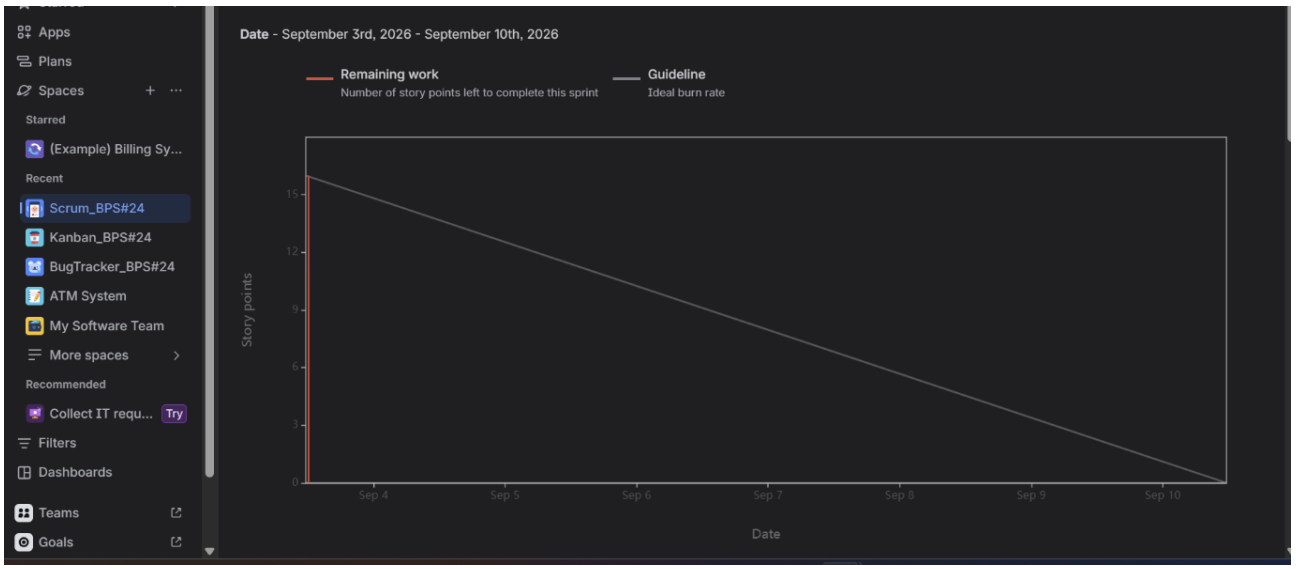

Screenshot 5

Sprint planning was used to divide the project work into manageable development iterations.

Screenshot 6,7

The Scrum project setup and planned work items are shown as part of the final project organisation.
